- SERVICE SECTOR IS GROWING-
- JOB GROWTH
- SKILLED WORKERS
- GLOBALIZATION
- HIGHER EDUCATION LEVELS

- An average of 610,000 new Canadian school leavers per year will enter the labour force over the next 10 years
- This is compared to an average of 510,000 in 1984-88 and 543,000 in 1994-98
- In contrast, immigration will add about 120,000 per year to the labour supply

 - Transportation and the construction industries both expanded by 20% during the same 5 year period
- The service producing sector is growing at a faster rate than the goods producing sector
- Growing occupations include
 - Management, trades and arts, culture, recreation and sport
- **From Sept 2005 to Sept 2006, 4,000 new jobs were created**

- Population projections show the fastest growing segment in our community is the 45+
- Average age will rise to 42 years in 2031 from 38 in 2005
- Children under 15 will raise by 6,350
- Youth population will remain steady through to 2011
- Employment increases have grown in proportion with the population growth
- Weak but positive employment growth over the remainder of 2006 and into 2007.
- Unemployment rate moderated around 6%
- Lots of churning normal in labour markets – retirements, parental/maternity leaves, new entrants, some industries growing such as Construction, Business building and other support services
- In-migration will likely decrease, going to Alberta

- **Ontario Economic Outlook for the next five years**
- The Ontario economy is no longer Canada's leading economic performer. Western Canada will continue to drive Canadian economic growth until around 2008. In Ontario, considerable internal economic readjustment will occur in the next five years:
 - manufacturing will continue to restructure, employing fewer workers;
 - large alternative energy projects will begin (nuclear, hydro, wind power, ethanol, etc);
 - as the first baby boomers hit 60 and begin to retire, a tight labour supply will begin to redefine the balance of power in the Ontario workplace. Employers will seek to retain older workers. A variety of solutions to will be tried to address increasing skill and labour shortages. Immigration and foreign worker issues will predominate.
